JD Edwards EnterpriseOne 9.2

**Transformational Innovation,
Choice, Industry Focus,
Low TCO**

JD Edwards EnterpriseOne offers a powerful, fully-integrated ERP software suite that provides more choice of databases and deployment options, including on-premise, private cloud, public cloud or hybrid cloud for maximized flexibility and low TCO. With over 80 application modules, end-user reporting, and personalization capabilities, JD Edwards EnterpriseOne combines business value, standards-based technology, and deep industry functionality into a solution that will transform your business. In addition to an array of out-of-the-box mobile applications, JD Edwards EnterpriseOne leverages Oracle's Mobile Platform to accelerate business execution and provide a complete enterprise mobile solution from deploying to building and extending mobile applications.

Used in Many Industry Segments

Manufacturing and Distribution

Industrial Manufacturing (discrete and process), Automotive Suppliers, Medical Devices, Life Sciences, Pharma, Wholesale Distribution

Consumer Products

Consumer Packaged Goods (CPG), Durable Consumer Products, Apparel Management, Food and Beverage Producers (agribusiness)

Projects and Services

Engineering and Construction, Commercial Real Estate, Homebuilding, Services Contractors, Public, Government

Capital Asset Intensive

Mining, Natural Resources, Oil and Gas, Green Energy, Chemicals and Lubricants, Utilities

Demonstrated Business Value

- Rapid time-to-value delivers faster ROI
- Low total cost of ownership (TCO) saves money
- Flexible personalization and configuration reduces initial and ongoing system costs
- Product scalability contributes to company growth
- Technology choices fit IT infrastructure, including Internet of Things (IoT)
- Integrations add new capabilities to best-in-class applications

Common Integrated Business Processes Addressed

- Acquire to Retire Assets
- Benefits to Payroll
- Cash to Invest

- Design to Build (Deploy)
- Install to Maintain
- Lead to Order
- Lease to Move Out
- Make to Deliver
- Opportunity to Order
- Order to Cash
- Order to Receive
- Plan to Demand
- Plan to Produce
- Procure to Pay
- Record to Measure
- Record to Record
- Recruit to Retire (Hire to Fire)
- Request to Resolve
- Source to Settle

Key Differentiators Over Other ERP Packages

- A tier one ERP suite that is economical and comprehensive, focusing on manufacturing and distribution, consumer goods, project-based and asset-intensive industries
- Built-in lifecycle and change management tools work across the entire system
- Enhanced JD Edwards EnterpriseOne integration platform that improves co-existence with other applications, including Oracle Cloud applications
- Mixed-mode manufacturing: Discrete, Repetitive, Lean, and Process
- IoT technology that captures and transmits data into JD Edwards applications for real-time action and analysis
- Built-in lifecycle and change management tools work across the entire system
- Tools allow simultaneous proliferation of changes to application security, usability, and performance across all products
- Options for complete and robust technology stacks and deployment
- All project costs automatically roll into the general ledger, with rapid calculations for accurate earned value for each project
- One general ledger is used for advanced cost accounting, fixed assets, labor, and expense management
